Drawing on a wide variety of opinions, Storr argues that the patterns of music make sense of our inner experience, giving both structure and coherence to our feelings and emotions. It is because music possesses this capacity to restore our sense of personal wholeness in a culture which requires us to separate rational thought from feelings, that many people find it so life-enhancing.

Music and the Mind - Anthony Storr - Google Books. "Writing with grace and clarity...he touches on everything from the evolution of the Western tonal system, to the Freudian theory of music as infantile escapism, to the differing roles o the right and left brain in perceiving music." WALL STREET JOURNAL Drawing on his own life long passion for music and synthesizing the theories of Plato, Schopenhauer, Stravinsky, Nietzsche, Bartok, and others, distinguished author and psychologist Anthony ...

~~Music and the Mind - Anthony Storr - Google Books~~
And when one has music in mind, I think he is saying that it is as much as what we bring to music in our yearnings, expectations, or current realities, at a given time and place in our lives, as it is as about what we take away from it that makes music so very personal. Storr recognises that music can engage us physically, emotionally, economically, environmentally, psychologically, socially, in solitude as well as isolation and spirituality.
