Stepper Motor & Stepper
Motor Driver -

STEPPERONLINE

One disadvantage of just paralleling two motors off one driver is that each motor would get roughly half the current that the driver would normally supply to one motor. The separate driver per motor configuration would allow each motor to get

File Type PDF 1

Axis Stepper

Motor Driver
Critical Velocity

full current. Either configuration could result in a skew of the Y axis (normal build) on the X-carve.
