eBundle: printed book and eBook download code The information in this book will serve you well on your exciting career path as an Aircraft Dispatcher: a critical link in air safety and a viable career option for many aviators. An Aircraft Dispatcher (ADX) is a licensed airman certificated by the Federal Aviation Administration (FAA), typically employed by airlines or companies operating large transport-category aircraft, who has joint responsibility with the captain for the safety and operational control of flights. Dispatchers legally authorize flight departures and have authority to delay or cancel flights if unsafe conditions exist. They disseminate flight information to the company and are the source of information provided to the traveling public. The FAA Practical Exam for Aircraft Dispatcher is equivalent to the Airline Transport Pilot (ATP) oral exam that an airline captain must successfully complete. study. It covers the aircraft dispatcher Practical Test Standard subject areas such as route planning, regulations, training and currency requirements, certification, responsibilities and authority, aviation weather, manuals and documents, as well as practical applications of all topics. In addition, special emphasis is placed on common areas of focus for the exam: situational questions, and a generic guide to the proper systems and procedures you can apply to the specific aircraft used in your individual operations. The Aircraft Dispatcher Oral Exam Guide provides current dispatchers with a thorough review for their annual proficiency checks, and is also beneficial to airmen and aspiring airline pilots seeking a better understanding of dispatch flight operations. Author David C. Ison has been involved in the aviation industry for over 32 years, as a flight instructor, a college professor, and as an ATP for both regional and major airlines flying domestic and international routes.

The Federal Aviation Administration (FAA) has published the Private Pilot - Airplane Airman Certification Standards (ACS) document to communicate the aeronautical knowledge, risk management, and flight proficiency standards for the private pilot certification in the airplane category, single-engine land and sea; and multiengine land and sea classes. This ACS incorporates and supersedes the previous Private Pilot Practical Test Standards for Airplane, FAA-S-8081-14. The FAA views the ACS as the foundation of its transition to a more integrated and systematic approach to airman certification. The ACS is part of the safety management system (SMS) framework that the FAA uses to mitigate risks associated with airman certification training and testing. Specifically, the ACS, associated guidance, and test question components of the airman certification system are constructed around the four

functional components of an SMS: Safety Policy that defines and describes aeronautical knowledge, flight proficiency, and risk management as integrated components of the airman certification system; Safety Risk Management processes through which internal and external stakeholders identify and evaluate regulatory changes, safety recommendations and other factors that require modification of airman testing and training materials; Safety Assurance processes to ensure the prompt and appropriate incorporation of changes arising from new regulations and safety recommendations; and Safety Promotion in the form of ongoing engagement with both external stakeholders (e.g., the aviation training industry) and FAA policy divisions. The FAA has developed this ACS and its associated guidance in collaboration with a diverse group of aviation training experts. The goal is to drive a systematic approach to all components of the airman certification system, including knowledge test question development and conduct of the practical test. The FAA acknowledges and appreciates the many hours that these aviation experts have contributed toward this goal. This level of collaboration, a hallmark of a robust safety culture, strengthens and enhances aviation safety at every level of the airman certification system.
