World War II started when Saturn and Ketu were transiting together in Aries, the first sign of Zodiac in 1939 and in exact conjunction on September 1, 1939. The war escalated during 1940-41 when Jupiter and Saturn were together in the sign Aries and Taurus. In 1945, the war ended when Saturn and Rahu came together in the sign Gemini. Prediction through Dasha System is the chief objective of Predictive Astrology. Maharshi Parashar has mentioned 43 types of Dashes in his "Brihat Parashar Hora Shastra". Here in this book the Vimshottari Dasha has been mentioned elaborately in particular, which is used extensively. Besides, the Ashtottari and Yogini Dashes have also been narrated briefly. Vimshottari Dasha system is based on constellation. This system is used throughout India and recognized by all. It is based on the lordship of planet. The native can have result according to the house of which the planet is the lord. So, it is essential to know the Karakatva of the house and the merit of the lord of it. The book has been composed keeping in view the problems of the students of All India Federation of Astrologers' Societies on the inspiration of Mr. Arun Kumar Bansal. This book explains the method of prediction on the basis of Dasha in any easy to understand manner. A learned astrologer has to make study of the three different parts of a horoscope - 1. Yoga, the combination of planets and Lords, 2. Period-sub-period i.e. dasha, 3. Gochar that is, transit. All the three parts are the supplements of each other. Yoga is most important among all the three parts. Period-sub-period i.e. dasha may prove to be futile if there is no Yoga in a horoscope. For example, Period-sub-period that of Lord of fifth house or of Karaka planet cannot bless a native with a child if there is no Santan Yoga in his horoscope. Likewise, Gochar too cannot do anything if there is no Yoga in a horoscope. So, all the three parts are essential to have the result.

This book deals with the determination of method of timing of events through dasha and transit. The horoscope and related divisional charts can simply give an indication about the auspicious and inauspicious probabilities on the basis of the study of house, house lord and significator whereas the timing of an event cannot be calculated without understanding the impact of major period & transit in operation so for getting timing of events in one's life, we use Dasha and transits. Dasha tells which planet is affecting the native at a particular time, whereas transit tells us which natal planet is vibrating because of the transiting planet. A combined result of Dasha and transit gives us the behavior of the native at a particular time. In nutshell the Horoscope and concerned divisional charts only indicate the promise in the horoscope, negative or positive, according to the position of house, house lord, significator, concerned house from the significator. But the time of fructification of event is indicated by the Dasha/Anterdasha of different planets. If a good dasha is in operation, the native will get good results according to the significations of the concerned dasha nath and its lordship in the horoscope. For determining the timing of events for various events such as education, profession, marriage, children, acquiring of vehicle, land and property, foreign travels, each subject is discussed in detail in different chapters. The principles to identify the timing of events are given with illustrations / examples.

Astrological analysis has two components. The first is the deduction of likely trends in the life of a native. This determines the basic promise of a horoscope. The second, and more important, is to determine the time when the relevant events, according to the promise, would happen. The first part requires astrological knowledge & calculations etc; while for the second part great perception, synthesis, intuition and divine help are required. Astrology is basically the art & science of deciphering the characteristics & impulses gathered by various planets by their position/ movement and their synthesis. It is the basic characteristics of planets as modified by various impulses/ vibrations which they receive and then imparts on the native. Essentially one has to understand planets- their relationship with houses, signs & Nakshatra and their roles as lords of sign/ houses, Nakshatra or its subdivisions, as dasha lords or their day to day transit with respect to their natal position or standard specific points like natal Moon, natal ascendant or dasha lords. This not only helps in understanding the basic promises, but the timing of their fructification as well.

Why are the planetary rulers in Vimshottari Dasha sequenced the way they are? This is one of the many questions that I have pondered in my studies of Vedic Astrology. In my search for an answer one thing became abundantly clear, there is not much on the subject. There are only a handful of authors whose material I have had the fortune to obtain who have attempted to address this question. In other works where this question is raised, the overall consensus is that the reason behind the order of planetary rulers in Vimshottari Dasha is a mystery that has yet to be solved. With not being able to find a suitable answer in any of the already published material, I stumbled upon a subject called Vortex-Based Mathematics in the summer of 2009, where I was now able to see a possible explanation for why the order of planets in Vimshottari Dasha follows the sequence that it does. So I decided in December 2009 to attempt to put in writing the connection I saw with Vimshottari and what is called Vortex-Based Mathematics. I had completed a manuscript in September 2011, but did not think I had enough material to publish a book. After coming across the manuscript and the work I had already done in late January 2015, I decided that it would be well worth it to proceed with publishing the material I had put together. It is my sincere hope that this will help to shed some light on unraveling the mystery behind the order of planets in Vimshottari Dasha.
