psychoanalysis and attachment theory. The Internal Working Model Bowlby's attachment theory, like classical psychoanalysis, has a biological focus (see especially Bowlby, 1969). Bowlby's critical contribution was his unwavering focus on the infant's need for an unbroken (secure) early attachment to the mother. He emphasized the

~~Reconciling Psychoanalytic Ideas with Attachment Theory~~

Attachment theory is a concept in developmental psychology that concerns the importance of "attachment" in regards to personal development. Specifically, it makes the claim that the ability for an individual to form an emotional and physical "attachment" to another person gives a sense of stability and security necessary to take risks, branch out, and grow and develop as a personality.

~~Attachment Theory—Psychologist World~~

The psychological theory of attachment was first described by John Bowlby, a psychoanalyst who researched the effects of separation between infants and their parents (Fraley, 2010). Bowlby hypothesized that the extreme behaviors infants engage in to avoid separation from a parent or when reconnecting with a physically separated parent—like crying, screaming, and clinging—were evolutionary mechanisms.

~~What is Attachment Theory? Bowlby's 4 Stages Explained.~~

Attachment can be defined as a deep and enduring emotional bond between two people in which each seeks closeness and feels more secure when in the presence of the attachment figure. Attachment behavior in adults towards the child includes responding sensitively and appropriately to the child's needs.

Attachment theory is finally becoming widely recognized and applauded, even by the psychoanalytic community, which gave Bowlby (the original theorist) and his collaborators so much grief for decades.

~~Amazon.com: Attachment Theory and Psychoanalysis ...~~

Within attachment theory, attachment means an affectional bond or tie between an individual and an attachment figure (usually a caregiver). Such bonds may be reciprocal between two adults, but between a child and a caregiver, these bonds are based on the child's need for safety, security, and protection, paramount in infancy and childhood.
