Exhaustion (fatigue) and then burnout can happen to anybody. Being autistic can make fatigue and burnout more likely, due to the pressures of social situations and sensory overload. If your child or the person you care for is experiencing fatigue or burnout, helping them to manage their energy levels is essential, as this guide explains.

Many parents find that some of the recommended strategies used with autistic children are not effective for their child with a PDA profile. These may therefore need adapting. When supporting a person with a PDA profile it's important to understand that they are not deliberately choosing to oppose you - they are having difficulty adapting and overcoming their need to be in control of their ...
