CCNA 200-301 Certification Lab Guide CCNA certification has become increasingly difficult and requires proper preparation to pass the exam. This lab guide is designed to prepare you 100% for the new exam. Learn all CCNA topics with a configuration-oriented "learn by doing" approach. Practice and verify your CLI technical skills with simulation labs that include configuration and operational commands. Cisco is aligning the new CCNA 200-301 certification exam with a shift to internet-based connectivity model and IP-only routing. The new exam removes all routing protocols except OSPFv2. There is a significant amount of wireless, automation and cyber security topics. That is attributed to the popularity of mobility services, cloud computing and SDN. The management of network infrastructure has radically changed with open source architecture. Cisco has programmable network devices and virtualization of physical equipment. CCNA engineers now support private and cloud data center connections.
