recommend that you have astonishing points.

Although we have been successful in our careers, they have not turned out quite as we expected. We both have changed positions several times-for all the right reasons-but there are no pension plans vesting on our behalf. Our retirement funds are growing only through our individual contributions. Michael and I have a wonderful marriage with three great children. As I write this, two are in college and one is just beginning high school. We have spent a fortune making sure our children have received the best education available. One day in 1996, one of my children came home disillusioned with school. He was

bored and tired of studying. “Why should I put time into studying subjects I will never use in real life?” he protested. Without thinking, I responded, “Because if you don't get good grades, you won't get into college.” “Regardless of whether I go to college,” he replied, “I'm going to be rich.”

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a

meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.

Well-known investment authors Mark and Joann Skousen explain their "10-percent solution", a simple strategy for building wealth from small, steady investments. Readers who invest just one-tenth of their income can become financially independent even if they are on limited budgets--and even if they are currently in debt. *High Finance on a Low Budget* covers every aspect of investing open

to low-income investors, including stocks, bonds, mutual funds, real estate, commodities, precious metals, art, tax shelters, and low-interest loans. Must reading for small, medium, and large investors--and especially for anyone on any income level who thinks investing is not for them.

This is the first English translation of one of the classical works of Marxist economic theory. When Rudolf Hilferding's *Finance Capital* was first published in 1919 it was acclaimed by reviewers as a continuation of Marx's *Capital*, and it has a major influence upon subsequent Marxist thought, especially in the analysis of imperialism where it provided some of the fundamental ideas for the theories of Bukharin and Lenin. But Hilferding's work was much more than

a study of imperialism, which was presented only in the last section of the book. It set out to examine the main tendencies in the development of the capitalist mode of production as a whole at the beginning of the twentieth century, beginning with an exposition of the theory of money (in which particular attention was paid to the growth of credit money), then analysing the increasingly important role of the banks in the mobilization of capital, along with the development of large corporations, cartels and trusts, and finally outlining a theory of economic crises. Hilferding's book has, however, more than an historical interest. It is a model for any renewed attempt to understand the 'latest phase of capitalist development' in the closing decades of the twentieth century, and Hilferding's ideas still

provide essential elements for the elaboration of theoretically enlightened and realistic policies in the socialist movement.

Preserving the Promise: Improving the Culture of Biotech Investment critically examines why most biotech startups fail, as they emerge from universities into an ecosystem that inhibits rather than encourages innovation. This "Valley of Death" squanders our public investments in medical research and with them, the promise of longer and healthier lives. The authors explicate the Translation Gap faced by early stage biotech companies, the result of problematic technology transfer and investment practices, and provide specific prescriptions for improving translation of important discoveries into safe and effective therapies. In

Preserving the Promise, Dessain and Fishman build on their collective experience as company founders, healthcare investor (Fishman) and physician/scientist (Dessain). The book offers a forward-looking, critical analysis of "conventional wisdom" that encumbers commercialization practices. It exposes the self-defeating habits of drug development in the Valley of Death, that waste money and extinguish innovative technologies through distorted financial incentives. Explains why translation of biotech discovery into medicine succeeds so infrequently that it's been dubbed the Valley of Death Uncovers specific decision-making strategies that more effectively align incentives, improving clinical and financial outcomes for investors, inventor/entrepreneurs, and patients Examines the critical, early

analysts and money managers would have you believe your finances are enormously complicated, and if you don't follow their guidance, you'll end up in the poorhouse. They're wrong. When University of Chicago professor Harold Pollack interviewed Helaine Olen, an award-winning financial journalist and the author of the bestselling *Pound Foolish*, he made an offhand suggestion: everything you need to know about managing your money could fit on an index card. To prove his point, he grabbed a 4" x 6" card, scribbled down a list of rules, and posted a picture of the card online. The post went viral. Now, Pollack teams up with Olen to explain why the ten simple rules of the index card outperform more complicated financial strategies. Inside is an easy-to-follow action plan that works in good
