Submitting whole bunch of drawing for a project was a tremendous job and draftsmen were the busiest persons on the project at the early stage and final stages of projects because they have to do lot of manual works. But now this task has been revolutionized due to introduction of CAD i.e. Computer Aided Design technology.

List of CAX companies - Wikipedia

CAD refers to computer-aided design, which is a creative design process that is done using a computer system. Its software, the CAD design program, is widely used by professionals in the design field that requires much precise technical drawings. However, it is not like other drawing programs where you can simply open and begin drawing. It requires a combination of tools and mathematical equations to get started, and in order to get the design precise.

Overview. Computer aided engineering primarily uses Computer Aided Design (CAD) software, which are sometimes called CAE tools. CAE tools are being used, for example, to analyse the robustness and performance of components and assemblies. The term encompasses simulation, validation, and optimisation of products and manufacturing tools.

Computer Aided Drafting. CAD (Computer Aided Drafting) is a course taken by students from various shops at the Upper Cape Cod Regional Technical School. Some of the shops that take CAD class include carpentry, electrical, plumbing, horticulture, and environmental science. CAD can be used to create various drawings on the computer including but not limited to architectural, engineering, and landscape design drawings.
