Connecting Android With Delphi Datasnap Server

Once the data module generates a Datasnap connection, it creates a DBXConnection and breakes the tunnel. This tunnel will not be re-established if you open a connection again.

Connecting the Client to DataSnap Server - RAD Studio

I wrote an Android application that uses DataSnap with Mobile connectors to comunicate with a delphi server. The application works without problems if imposed as a target platform Android-10 (ver. 2.3.3), Instead, if I get over this version does not work anymore, While debugging, I think I saw an exception about a null pointer inside the Java code generated by delphi.
