Traditional Logic, Book II: Advanced Formal Logic, by Martin Cothran, is a continuation of Memoria Press' Traditional Logic, Book I. It covers the four figures of the traditional syllogism, the three forms of rhetorical arguments (called enthymemes), the three kinds of hypothetical syllogisms, the four kinds of complex syllogisms, as well as relational arguments.

Elementary Logic Second 2nd Edition

This text is designed for the Critical Thinking and Logic courses found in philosophy and general education departments at both universities and colleges. The most unique feature of the text is its solid foundation in logic. The discussion of fallacies is integrated with logic in a way not seen in other texts.

Oxford University Press

Hodges, please get a second edition of this wonderful book back into print!! This is probably the best intro there is to modern logic for people without prior training in science and math. The examples are all taken from linguistics and philosophy. Ironically, the author is also a high power mathematician, but he does not let that show.

Dorothy Edgington, University of Oxford
"Logical Forms is written in a way that makes the dry, abstract problems of philosophical logic accessible. It is one of the best books of its kind and is thoroughly recommended."

Logical Forms: An Introduction to Philosophical Logic, 2nd ...

This comprehensive monograph is a cornerstone in the area of mathematical logic and related fields. Focusing on Gentzen-type proof theory, the book presents a detailed overview of creative works by the author and other 20th-century logicians that includes applications of proof theory to logic as well as other areas of mathematics. 1975 edition.

Definability—an Approach to ...

The analysis shows that if second-order logic is understood in its full semantics capable of characterizing categorically central mathematical concepts, it relies entirely on informal reasoning. On the other hand, if it is given a weak semantics, it loses its power in expressing concepts categorically. ... On extensions of elementary logic ...
