equilibrium with a third then they are in thermal equilibrium with each other. We can discover an important property of thermal equilibrium by considering three systems. A, B, and C, that initially are not in thermal equilibrium. We separate systems A and B

Where To Download Fundamentals Of

with an adiabatic wall (ideal insulating material), but we let system C interact with both systems A and B.

What is Thermodynamic Property
- Definition

Where To Download Fundamentals Of

The equality of temperature is the only requirement for thermal equilibrium. The zeroth law of thermodynamics states that if two bodies are in thermal equilibrium with a third body, they are also in thermal equilibrium with each other. It may seem silly that such
