This substantial volume comprises almost fifty Semitic and Assyrological studies dedicated to Pelio Fronzaroli, professor of Semitic philology at the University of Florence, written by colleagues and pupils.

Anyone interested in the history of Eritrea, Ethiopia, or Italian and British Imperialism will learn much from this book. It gives the full texts of the treasure-house of unpublished documents on which the same author's *Lords of the Red Sea* was based. These documents were produced at the end of the 19th century by the Italian administrators in Eritrea who dealt with the local nomads. These young officers became intrigued by the society and history of the highly developed Habab tribe, even as they became part of that history, replacing loose hegemony with direct sovereignty. Their records document not only their own important role in the "Scramble for Africa" but also the whole culture and historical memory of a fascinating society.

Sicilian Elements in Andrea Camilleri's Narrative Language examines Camilleri's unique linguistic repertoire and techniques over his career as a novelist. It focuses on the intensification of Sicilian linguistic features in Camilleri's narrative works, in particular features pertaining to the domains of sounds and grammar, since these have been marginalized in linguistic-centered research on the evolution of Camilleri's narrative language and remain overall understudied. Through a systematic comparative analysis of the distribution patterns of selected Sicilian features in a selection of Camilleri's historical novels and novels of the Montalbano series, the author identifies the individual features that have become most widespread and the lexical items that are targeted with highest frequency and consistency. The results of the analysis show that in the earlier novels, Sicilian features are rather sparse and can be attributed to linguistic situational functionality; that is, they function as indices of salient, distinctive aspects of topics, settings, events/situations, and characters. Conversely, in the latest novels, Sicilian

Online Library Gli Otto Cugini

elements pervade the entire novels and the texts are written almost entirely in Camilleri's own Sicilian, vigatese, so that Sicilian is stripped of any linguistic situational functionality.

"Did Rudolf Steiner dream these things? Did he dream them as they once occurred, at the beginning of all time? They are, for sure, far more astonishing than the demiurges and serpents and bulls found in other cosmogonies.' -- Jorge Luis Borges

Rudolf Steiner recorded his view of the world in numerous books. He also gave more than 5,000 lectures, in which he explained his ideas, using only minimal notes. When describing especially difficult subjects, Steiner frequently resorted to illustrating what he was saying with colored chalk on a large blackboard. After his earlier lectures, the drawings were erased and irretrievably lost. After the autumn of 1919, however, thick black paper was used to cover the blackboards so that the drawings could be rolled up and saved. The Trustees of Rudolf Steiner's Estate in Dornach, Switzerland, possess more than a thousand such drawings. A selection of these drawings was first shown to the general public in 1992, and since then, exhibitions in Europe, America, and Japan have generated much interest in Steiner's works.
