The Whitfield Estate is hidden deep in the Big Thicket outside of Soda, Texas. This reclusive family brood amassed their oil and timber fortune over four generations, and now that it's been done, they have become painfully aware of how isolated and broken they are as a family. Tessa Nettles, fresh from college, is hired as the estate manager. But her main role is to help the youngest Whitfield, Caroline, have a more normal life. She has been cloistered away at Whitfield for the whole of her first fourteen

years. Now, her oldest brother, Grayson, wants to make a happier life for her than he and their brother, Travis, had. But first, he will have to deal with the strange lights that fall from the sky over the Trinity River and their connection with the mysterious voices at the end of the road. The voices of entities that have secretly been Caroline's only friends her whole life. Are these ghostly entities dangerous? Will they want Tessa gone from Whitfield? Will Old Gullah Woman and Preacher Man be allowed to stay on in the rundown river cabin, stirring up the waters and calling down the mysterious lights? Or will the Whitfield matriarch run them off, even after their Gullah potions kept her husband alive two years longer than the doctors could have? Will Tessa bring harmony to the

Lasers are progressively more used as versatile tools for fabrication purposes. The wide range of available powers, wavelengths, operation modes, repetition rates etc. facilitate the processing of a large spectrum of materials at exceptional precision and quality. Hence, manifold methods were established in the past and novel methods are continuously under development. Biomimetics, the translation from nature-inspired principles to technical applications, is strongly multidisciplinary. This field offers intrinsically a wide scope of

Applications for laser based methods regarding structuring and modification of materials. This book is dedicated to laser fabrication methods in biomimetics. It introduces both, a laser technology as well as an application focused approach. The book covers the most important laser lithographic methods and various biomimetics application scenarios ranging from coatings and biotechnology to construction, medical applications and photonics.

Watching the kite ascend higher into the sky, ten-year-old Raghav felt butterflies run deep down his gut, inflating his desire to fly high in a supersonic jet. His kite, entangled with another, crashed onto the ground. The flight took off smoothly from the runway of her heart, only to

be hit by turbulence and thunderstorms smashing the plane into an abandoned sea full of gloominess. There he saw a lighthouse, a ray of hope. She became his lifeguard and taught him to swim through the storm. Like a guiding angel, she enlightened him towards the path of self-discovery leading to his journey to the island called ' Bollywood. ' Raghav rode on a roller coaster encompassing love, passion, and conflicts. Hopping from one town to another in search of his purpose, he landed in the city of love and lights, Paris, where he saw the horizon, an illusion of his world merging with hers. But just like the two poles on Earth never meet, so was his destiny. On one side, he had Diya whom he could never get, and on the other side was Niharika whom
