Project Earth Science: Astronomy, Revised 2nd Edition, involves students in activities that focus on Earth's position in our solar system. How do we measure astronomical distances? How can we look back in time as we gaze across vast distances in space? How would our planet be different without its particular atmosphere and distance to our star? What are the geometries among Earth, the Moon, and the Sun that yield lunar phases and seasons? Students explore these concepts and others in 11 teacher-tested activities.

Studies the role of the earth in the universe, the forces and materials that shaped the earth, and the factors that describe its nature today.

The earth in the Universe; The earth and its motions; The materials of the earth's surface; The forces that shape and sculpture the earth's surface; The record of earth history; the earth's envelope of water; The earth's atmosphere; The climates of the earth.
