In Houses, Villas, and Palaces in the Roman World, Alexander G. McKay examines simple houses, mansions, estates, and palatial buildings, and he pays particular attention to accounts of ancient writers that deal with such topics as house design, interiors, furnishings, and gardens. Describing innovative high-rise apartments, her compact civic squares, large public buildings, temples, shopping centers, and commercial areas, he shows that Roman civilization was astonishingly similar to our own.

McKay has enhanced the text by the inclusion of over 150 illustrations of plans, sites, and reconstructions.

Roman Villas explores the social structures of the Roman world by analysing the plans of buildings of all sizes from slightly Romanized farms to palaces. The ways in which the rooms are grouped together; how they intercommunicate; and the ways in which individual rooms and the house are approached, reveal various social patterns, which question traditional ideas about the Roman family and household. J. T. Smith argues that virtually all houses were occupied by groups of varying composition, challenging the received wisdom that they were single family houses whose size reflected only the owner's wealth and number of servants. Roman Villas provides a meticulously documented and scholarly examination of the relationship between the living quarters of the Roman and their social and economic development which introduces a new area in Roman studies and a corpus of material for further analysis. The inclusion of almost 500 ground plans, drawn to a uniform scale, allows the reader to compare the similarities and differences between house structure as well as effectively illustrating the arguments.

Egypt's romantic allure does not end with the age of the pharaohs. This lavishly illustrated book offers an unprecedented look inside the opulent estates of the pashas, khedives, and great ladies of 19th-century Egypt, and the princes and kings of the early 20th century.

Archaeology has unearthed the glories of ancient Jewish buildings throughout the Mediterranean. But what has remained shrouded is what these buildings meant. Building Jewish first surveys the architecture of small rural villages in the Galilee in the early Roman period before examining the development of synagogues as "Jewish associations." Finally, Building Jewish explores Jerusalem's flurry of building activity under Herod the Great in the first century BCE. Richardson's careful work not only documents the culture that forms the background to any study of Second Temple Judaism and early Christianity, but he also succeeds in demonstrating how architecture itself, like a text, conveys meaning and thus directly illuminates daily life and religious thought and practice in the

ancient world.

This volume offers a comprehensive survey of Roman villas in Italy and the Mediterranean provinces of the Roman Empire, from their origins to the collapse of the Empire. The architecture of villas could be humble or grand, and sometimes luxurious. Villas were most often farms where wine, olive oil, cereals, and manufactured goods, among other products, were produced. They were also venues for hospitality, conversation, and thinking on pagan, and ultimately Christian, themes. Villas spread as the Empire grew. Like towns and cities, they became the means of power and assimilation, just as infrastructure, such as aqueducts and bridges, was transforming the Mediterranean into a Roman sea. The distinctive Roman/Italian villa type was transferred to the provinces, resulting in Mediterranean-wide culture of rural dwelling and work that further unified the Empire.
