Introduction to Criminology, Why Do They Do It?, Second Edition, by Pamela J. Schram Stephen G. Tibbetts, offers a contemporary and integrated discussion of the key theories that help us understand crime in the 21st century. With a focus on why offenders commit crimes, this bestseller skillfully engages students with real-world cases and examples to help students explore the fundamentals of criminology. To better align with how instructors actually teach this course, coverage of violent and property crimes has been integrated into the theory chapters, so students can clearly understand the

application of theory to criminal behavior. Unlike other introductory criminology textbooks, the Second Edition discusses issues of diversity in each chapter and covers many contemporary topics that are not well represented in other texts, such as feminist criminology, cybercrime, hate crimes, white-collar crime, homeland security, and identity theft. Transnational comparisons regarding crime rates and the methods other countries use to deal with crime make this edition the most universal to date and a perfect companion for those wanting to learn about criminology in context.

This book provides a comprehensive and up-to-date introduction to criminological theory for students taking courses in criminology at both undergraduate and postgraduate level. Building on previous editions, this book presents the latest research and theoretical developments. The text is divided into five parts, the first three of which address ideal type models of criminal behaviour: the rational actor, predestined actor and victimized actor models. Within these, the various criminological theories are located chronologically in the context of one of these different traditions, and the strengths and weaknesses of each theory and model are clearly identified. The fourth part of the book looks closely at more recent attempts to integrate theoretical elements from both within and across models of criminal behaviour, while the fifth part addresses a number of key recent concerns of criminology: postmodernism, cultural criminology, globalization and communitarianism, the penal society, southern criminology and critical criminology. All major theoretical perspectives are considered, including: classical criminology, biological and psychological positivism, labelling theories, feminist criminology, critical criminology and left realism, situation action, desistance theories, social control theories, the risk society, postmodern condition and terrorism. The new edition also features comprehensive coverage of recent developments in criminology, including 'the myth of the crime drop', the revitalization of critical criminology and political economy, shaming and crime, defiance theory, coerced mobility theory and new developments in social control and general strain theories. This revised and expanded fifth edition of *An Introduction to Criminological Theory* includes chapter summaries, critical thinking questions, policy implications, a full glossary of terms and theories and a timeline of criminological theory, making it essential reading for those studying criminology and taking courses on theoretical criminology, understanding crime, and crime and deviance

This book, first published in 1936, provides an introduction to the various branches of criminology, including criminal psychology and criminology as an applied science. This title also provides an overview of some of the different criminological schools and theories. This book will be of interest to students of criminology and sociology.

A comprehensive introduction to all the key topics, perspectives, and themes that you will cover when studying criminology and criminal justice. *An Introduction to Criminology* provides you with a thorough grounding in the main traditions and perspectives within the discipline and introduces cutting edge emerging themes that will shape criminology for years to

activities, and more. " A Student study site provides additional articles, self-study quizzes, e-flashcards, and more.

A unique text/reader that takes a comprehensive, interdisciplinary approach to the study of criminology Providing an affordable alternative to the standard textbook, this new edition of the authors' popular text/reader provides instructors and students the best of both worlds – authored text with carefully selected accompanying readings. Now thoroughly updated with new articles, new content, and new statistics, tables, and figures, this Second Edition provides an interdisciplinary perspective on crime and criminality that incorporates the latest theories, concepts, and research from sociology, psychology, genetics, evolutionary biology, and the neurosciences. The new edition is divided into 15 sections that mirror chapters in a typical criminology textbook. New to This Edition: A new Section 11 on Mass Murder and Terrorism makes coverage of these high-interest topics even more accessible. Section 10 now focuses only on murder, rape, robbery, aggravated assault, and domestic violence, making it easier for students to absorb the material. New articles appear in the structural theories section, the sections devoted to violent crime, and throughout the text/reader as needed. The authors now more closely link sections on types of crime to sections on theory to give readers a more cohesive understanding of the connections between the two. Contemporary criminologists' favored theories (drawn from a survey of 770 criminologists) now appear in a table to give readers insight into the professional opinion today on criminological theories. Features: Each Section has a 15-page introduction (a "mini-chapter") that contains vignettes, photos, tables and graphs, end-of-chapter questions, and Web exercises, followed by three to four supporting readings. Theory Section introductions contain a unique table that compares and contrasts the theories presented, while theory concluding sub-sections focus on policy and crime prevention. A "How to Read a Research Article" guide (which appears prior to the first reading) illustrates key aspects of a research article. The book's readings are drawn from carefully selected, edited journal articles appropriate for an undergraduate audience.
