(INTRODUCTION) Introduction To

International Economics Study

international economics is the idea that there are gains from trade-that is, that when countries sell goods and services to one another, this is almost always to their mutual benefit. The range of circumstances under which international trade is beneficial is much wider than most people appreciate.

The infant-industry theory is the supposition that emerging domestic industries need protection against international competition until they become mature and stable. In economics, an infant industry is one that is new and in its early stages of development, and not yet capable of competing against established industry competitors.

International Economics: It's Concept & Parts

International relations (IR) or international affairs (IA)—commonly also referred to as international studies (IS), global studies (GS), or global affairs (GA)—is the study of politics, economics and law on a global level.

~~International relations—Wikipedia~~

LAND ECONOMICS • Therefore we can say that land economics is the application of the principles and theory of economics to the problem relating to the use of land. • It is also in this perspective that welfare economics, labour economics, international trade and political economy are considered as studies relating to how economist can explain human actions in these particular fields.
