Investment Banking and Security Market Development: Does ...

An investment bank is different from a securities firm, but it is also different from a commercial bank. The main purpose of an investment bank is to help a client issue securities, such as stocks and bonds, to the marketplace. Whereas a commercial bank may lend a client money from its own capital, an investment bank seeks out new investors to purchase the securities for its client, thereby raising money for the company.

When a business has to go on the capital market, it hires an investment banking firm that looks at the financials of the business and the total amount of money the business needs to raise. The investment bank then advises the business on the best way to raise that money—by either issuing stock or bonds—and then helps put together and sell a public offering of the securities.
