Isobar Isotherm Map

Lab - BetterLesson

Objective The

purpose of this lab is

to become familiar

with how to construct

isotherms and isobar

maps. An isotherm is

a map that connects

equal values of

temperature in

intervals of  $10^{\circ}$  F.

To create an isotherm

map you must first

# Bookmark File

## PDF Isotherm

find the lowest value ranging from 10-100 ° F and connect all the points of the same values.

weather maps follow a sequence of values that can be found by adding or subtracting 4 from 1000. Each succeeding isobar is a multiple of 4 from then on. Examples of isobar values are 988, 992, 996, 1000, 1004, 1008, 1012, 1016, 1020, 1024, 1028, 1032, ...

Notice all values are

An isobar is a line of constant pressure.

There are many other terms like these

which are known

collectively as

"isopleths". Isotherms

and isobars, plus

other isopleths, are
