Many artificial
neurons act less
like neurons and
more like
transistors with two
simple states: on or
off. If enough
upstream neurons
are on rather than
off, the neuron is
on. Otherwise, it's
off.

Artificial Intelligence and Machine Learning are much trending and also confused terms nowadays.

Machine Learning (ML) is a subset of Artificial

Intelligence. ML is a science of designing and applying

algorithms that are able to learn things

Page 28/43

Learning Data

Artificial intelligence is not natural, and it is a simulation of how the human mind works. Much like a machine, the human brain controls all function of an organism.

Javascript

On a quest for artificial intelligence, Arthur Samuel at IBM coined the term “Machine Learning” in 1959. Machine Learning involves a lot of math as you’ll see in a little bit but it’s only a narrow section of data science. This field is also very
