JavaScript DOM Document - W3Schools
For my plugins and JS tools, I prefer to write my long-form documentation instead of letting JSDoc do it for me. It's more work, but it results in documentation that's more beginner friends and reads like it was written by a human (because it was). I tend to use the same rough format for my docs, but pick whatever works for you.

JavaScript HTML DOM Examples - W3Schools
The Documentinterface represents any web page loaded in the browser and serves as an entry point into the web page's

content, which is the DOM tree. The DOM tree includes elements such as <body>and <table>, among many others.

Document - Web APIs | MDN
Every function in JavaScript is a Function object. See Function for information on properties and methods of Function objects. To return a value other than the default, a function must have a return statement that specifies the value to return. A function without a return statement will return a default value.

Functions - JavaScript | MDN
The JavaScript Array class is a global object that is used in the construction of arrays; which are high-level, list-like objects.. Description. Arrays are list-like objects whose prototype has methods to perform traversal and mutation operations. Neither the length of a JavaScript array nor the types of its elements are fixed.

Array - JavaScript | MDN
JSDoc is a markup language used to annotate JavaScript source code files. Using comments containing JSDoc, programmers can add documentation describing the application programming interface of the code they're creating. This is then processed, by various tools, to produce documentation in accessible formats like HTML and Rich Text Format.
