Jerome Bruner, Teaching, Learning and the Spiral Curriculum. 1. Jerome Bruner was one of the most important psychologists of the 20thcentury, though it is in the field of education that his influence has been most keenly felt. Two of his books, The Process of Educationand Towards a Theory of Instruction,have come to be recognized as landmark works and reveal Bruner ' s particular view of the educational theory known as constructivism.

~~Jerome Bruner, Teaching, Learning and the Spiral Curriculum~~

Bruner (1966) was concerned with how knowledge is represented and organized through different modes of thinking (or representation). In his research on the cognitive development of children, Jerome Bruner proposed three modes of representation: Enactive representation (action-based) Iconic representation (image-based)

~~Bruner - Learning Theory in Education | Simply Psychology~~

Bruner believed that when children start to learn new concepts, they need help from teachers and other adults in the form of active support. To begin with, they are dependent on their adult support, but as they become more independent in their thinking and acquire new skills and knowledge, the support can be gradually faded.

Jerome S. Bruner has had a profound effect on education – and upon those researchers and students he has worked with. Howard Gardner has commented: Jerome Bruner is not merely one of the foremost educational thinkers of the era; he is also an inspired learner and teacher. His infectious curiosity inspires all who are not completely jaded.

~~Jerome Bruner and the process of education — infed.org:~~

Jerome Bruner, in full Jerome Seymour Bruner, (born October 1, 1915, New York, New York, U.S.—died June 5, 2016, New York, New York), American psychologist and educator who developed theories on perception, learning, memory, and other aspects of cognition in young children that had a strong influence on the American educational system and helped launch the field of cognitive psychology.

~~Jerome Bruner | American psychologist | Britannica~~

Bruner ' s constructivist theory is a general framework for instruction based upon the study of cognition. Much of the theory is linked to child development research (especially Piaget). The ideas outlined in Bruner (1960) originated from a conference focused on science and math learning. Bruner illustrated his theory in the context of mathematics and social science programs for young children (see Bruner, 1973).

~~Constructivist Theory (Jerome Bruner ...~~

Discovery Learning (Bruner) Discovery Learning is a method of inquiry-based instruction, discovery learning believes that it is best for learners to discover facts and relationships for themselves.

~~Discovery Learning (Bruner) — Learning Theories~~

Dr. Jerome Bruner, born in 1915, is an American psychologist whose work has become especially influential in the field of education. "The Process of Education," published in 1960, outlined a theoretical approach to education that has been widely adopted in schools and universities in America and the United Kingdom.

Bruner's work - language and learning in his later works, Bruner was greatly influenced by Vygotsky and changed his direction from an in-the-hand approach to learning to a more social and political approach to learning. In this approach, Bruner argued that cognitive function is primarily supported by language and therefore social conditions should encourage students to learn the language. Bruner subsequently focused on the impact of society on cognitive development, with a particular focus ...

Cognitive Psychology — Cognitive Learning Theory. In Bruner ' s research of cognitive development of children in 1966, he proposed three modes of representations — enactive, iconic, and symbolic.

~~Jerome Bruner — Cognitive Learning | by Thelma Garrison ...~~

At the time Bruner was earning his PhD and then teaching for a decade at Harvard, the predominant school of thought in psychology was behaviorism. The idea that learning was reduced to a stimulus and response did not sit well with him as he felt it overlooked essential aspects of human perception.

~~The Important Work of Jerome Bruner — Educa~~

To the foundation of constructive learning theory established by Piaget, Jerome Bruner contributed important ideas regarding (a) modes of representation, (b) the importance of teaching and learning “ optimal structure ” (J. S. Bruner, 1966b, p. 41), (c) the spiral curriculum, and (d) learning through acts of discovery in order to rearrange and transform what is learned “ in such a way that one is enabled to go beyond the evidence so reassembled to additional new insights ” (J. S. Bruner ...

~~Discovery Learning (Jerome Bruner — 1961) | Principles of ...~~

Bruner states that what determines the level of intellectual development is the degree to which the child has received adequate instruction along with practice or experience. Therefore, the correct way to teach and explain, will allow a child to understand a general concept that at first is only understood by an adult.

~~The learning theory of Bruner vs Piaget and Vygotsky ...~~

Bruner proposed the concept of scaffolding. Scaffolding is the action that an adult performs to assist the child in learning something that would otherwise be beyond them. Examples of scaffolding include modelling, making suggestions, or structuring learning into manageable parts.

~~Jerome Bruner and Early Education | Right from the Start~~

In the 1960s, American cognitive psychologist Jerome Bruner called this the Constructivist Approach — the way in which we construct meaning for ourselves. This approach is around us every day in the classroom; pupils are constantly constructing and reconstructing their understanding of the world as new experiences and interactions occur.
