The ongoing
paradigm change in
regard to the use of
energy, its efficient
usage and the
consumption of

Where To Download

resources is giving rise to new light systems and lighting appliances. This development might also lead to the use of light as a building material in its own right, comparable to traditional building materials, making it possible to create light space productions

Where To Download

something that did not seem feasible up to now due to the high cost of energy and of light systems. The goal of this book is to develop temporary light spaces that re-interpret the existing urban environment on a seasonal basis or over a cycle of several years. As a result, the city will

Where To Download

literally appear in a new light. Strollers in the city streets will experience their familiar environment in a new way. Illuminated planes interlacing with planes made by linear fields of light beams will create immaterial material space experiences: still lifes of light within which

Where To Download

one can move about
and light
choreographies that
move barely
noticeably, creating
still lifes in motion.
Current research aims
at exploring,
imagining and
inventing stand-alone
spatial structures of
light, adding on to and
transforming existing
spaces, creating a

Where To Download

new spatial
awareness that may
enable people to
experience urban
space in a different
way. Similar to the
process of
architectural design,
where haptic built
volumes create
interspaces, the light
spaces that are
presently being
designed make these

Where To Download

interspaces visible
and allow urban
dwellers to
experience
unexpected spatial
constellations. The
discourse in this book
starts with essays
introducing aspects of
light spaces, including
the following:
Christian Bartenbach
on the perception of
light as something

Where To Download

that creates space;
Niels Gutschow on
the ritual dimension of
light, an element in
the history of creation;
Samuel Widmer on
light in near-death
experiences; Aldous
Huxley on light as the
messenger from a
world we perceive on
an unconscious level;
Junichiro Tanizaki on
the world of the

Where To Download

shadow and Tadashi Endo on movement as a relation between time and space in Butoh, the Japanese dance of darkness. The discourse concludes with documents on light spaces by Wolfgang Rang collected over a period of 30 years showing how these light spaces were

Where To Download

regarded in the
writings of con-
temporaries, including
Max Bächer on the
dawn of a new era;
Hans-Peter Schwarz
on the deconstruction
of space by light;
Jürgen Hasse on light
as a discourse
fragment of public
space; Manuel
Cuadra on red
luminescence; and

Where To Download

Antonio de Campos
on shadow as an
expression of light.
