The Making of a Socialist. Someone has said that fools learn from experience, and wise men from observation and reflection. If this be correct, it is to be feared that the dictum of Carlyle as to most people on these islands being found in the former category has a good deal of truth in it. Certainly, with regard to political and economic ...

Histories of British socialism are nothing new, with classic studies in the field going back to G. D. H. Cole. Mark Bevir's new book, however, comes from a slightly different perspective, in that it focuses on the 'making' of British socialism in, broadly, the final quarter of the 19th century. It has been argued that British socialism is not really a fixed and definitive thing but ...

Updated June 10, 2020. Socialism is an economic system where everyone in society equally owns the factors of production. 1 ? That ownership is acquired through a democratically elected government or through a cooperative or a public corporation in which everyone owns shares. The four factors of production are labor , capital goods , natural resources, and, in the modern era, entrepreneurship.

A key element in its success is the way the Chinese inserted themselves into the global market (capitalist) on their own terms, gradually, and making use of very protectionist conditions (socialist). There are several examples of very well balanced mixes in democracies too: Germany, Scandinavia, Japan, Korea, New Zealand, Canada.

Pragmatism should be the dogma, not capitalism or socialism

A. Lee asks if 'Rewilding' is just a way for capitalism to sell us stuff. Well, yes and no. The origins of the word are in ecology, but in capitalism's drive to market new products, companies have latched onto the word "rewilding" as the latest desirable thing. In recent years there has ...

receiving.”—Lawrence H. Summers, Democracy As a correspondent for the French newspaper Le Monde, world-renowned economist Thomas Piketty has documented the rise and fall of Trump, the drama of Brexit, Emmanuel Macron’s ascendance to the French presidency, the unfolding of a global pandemic, and much else besides, always from the perspective of his fight for a more equitable world. This collection brings together those articles and is prefaced by an extended introductory essay, in which Piketty argues that the time has come to support an inclusive and expansive conception of socialism as a counterweight against the hypercapitalism that defines our current economic ideology. These essays offer a first draft of history from one of the world’s leading economists and public figures, detailing the struggle against inequalities and tax evasion, in favor of a federalist Europe and a globalization more respectful of work and the environment.

This unique political and biographical document records the words of T.C. Douglas, one of Canada's first and foremost Socialist leaders, in a series of transcribed interviews conducted in 1958 with political journalist Chris Higginbotham.

A compelling look at the origins of British socialism The Making of British Socialism provides a new interpretation of the emergence of British socialism in the late nineteenth century, demonstrating that it was not a working-class movement demanding state action, but a creative campaign of political hope promoting social justice, personal transformation, and radical democracy. Mark Bevir shows that British socialists responded to the dilemmas of economics and faith against a background of diverse traditions, melding new economic theories opposed to capitalism with new theologies which argued that people were bound in divine fellowship. Bevir utilizes an impressive range of sources to illuminate a number of historical questions: Why did the British Marxists follow a Tory aristocrat who dressed in a frock coat and top hat? Did the Fabians develop a new economic theory? What was the role of Christian theology and idealist philosophy in shaping socialist ideas? He explores debates about capitalism, revolution, the simple life, sexual relations, and utopian communities. He gives detailed accounts of the Marxists, Fabians, and ethical socialists, including famous authors such as William Morris and George Bernard Shaw. And he locates these socialists among a wide cast of colorful characters, including Karl Marx, Henry Thoreau, Leo Tolstoy, and Oscar Wilde. By showing how socialism combined established traditions and new ideas in order to respond to the changing world of the late nineteenth century, The Making of British Socialism turns aside long-held assumptions about the origins of a major movement.

things a little more intelligently than many of the workers have opportunity to do, I want this sketch of my life to be considered. I have ventured to have this story published for several reasons one is, that several who read it in the New York Call have written to me suggest ing such a course; another is, that while we have built up a good scientific literature of Socialism here in America, yet we are short of books of lighter vein, biography, fiction, poetry mere literature with us is scant, soi feel there is a place for such a book; again I don't know why the story is not well enuf told to be put into a book; but the reason above all others is, that my faith in the Cause is such, that I would rather myname be permanently connected with it than with anything else. The Making of My Socialism I consider the most important thing in my life; for the Cause, I have thrown away any chances I may have had of professional success; I have sacrificed many things that once loomed big for me, and thus I want to put on record my affiliation with the International Socialist Movement. David Lane outlines succinctly yet comprehensively the development and transformation of state socialism. While focussing on Russia and the countries of Eastern Europe, he also engages in a discussion of the Chinese path. In response to the changing social structure and external demands, he outlines different scenarios of reform. He contends that European state socialism did not collapse but was consciously dismantled. He brings out the West's decisive support of the reform process and Gorbachev's significant role in tipping the balance of political forces in favour of an emergent ascendant class. In the post-socialist period, he details developments in the economy and politics. He distinguishes different political and economic trajectories of countries of the former USSR, the New Member States of the European Union, and China; and he notes the attempts to promote further change through 'coloured' revolutions. The book provides a detailed account not only of the unequal impact of transformation on social inequality which has given rise to a privileged business and political class, but also how far the changes have fulfilled the promise of democracy promotion, wealth creation and human development. Finally, in the context of globalisation, the author considers possible future political and economic developments for Russia and China. Throughout the author, a leading expert in the field, brings to bear his deep knowledge of socialist countries, draws on his research on the former Soviet Union, and visits to nearly all the former state socialist countries, including China.

Roland Sawyer was an American minister, politician, and advocate for Christian Socialism. His book, *The Making of a Socialist*, was first published in 1911, and is often cited as a Christian support for Socialism.

Eastern European prefabricated housing blocks are often vilified as the visible manifestations of everything that was wrong with state socialism. For many inside and outside the region, the uniformity of these buildings became symbols of the dullness and drudgery of everyday life. *Manufacturing a Socialist Modernity* complicates this common perception. Analyzing the cultural, intellectual, and professional debates surrounding the construction of mass housing in early postwar Czechoslovakia, Zarecor shows that these housing blocks served an essential function in the planned economy and reflected an interwar aesthetic, derived from constructivism and functionalism, that carried forward into the 1950s. With a focus on prefabricated and standardized housing built from 1945 to 1960, Zarecor offers broad and innovative insights into the country's transition from capitalism to state socialism. She demonstrates that during this shift, architects and engineers consistently strove to meet the needs of Czechs and Slovaks despite challenging economic conditions, a lack of material resources, and manufacturing and technological limitations. In the process, architects were asked to put aside their individual creative aspirations and transform themselves into technicians and industrial producers. *Manufacturing a Socialist Modernity* is the first comprehensive history of architectural practice and the emergence of prefabricated housing in the Eastern Bloc. Through discussions of individual architects and projects, as well as building typologies, professional associations, and institutional organization, it opens a rare window into the cultural and economic life of Eastern Europe during the early postwar period.
