Mira Activities: Using the mira* The mira is a mirror through which you can see (to the other side of the mirror). This allows you to perceive the reflected image in the mira as actually being on the other side. Place the mira between points A & B so that the image of A overlaps B. A MIRA is an optical drawing tool that is partly reflective and partly transparent. A MIRA can be used to draw points and lines very accurately. The “drawing” edge of the MIRA is the beveled edge. Every time you need to draw the line of reflection make sure you are using the “drawing” edge. Finding line of reflection

These MIRA manipulatives are great to use with symmetry ...

(A Mira is a reflective geometry tool that can be purchased.) They were allowed to choose magazine photos I had carefully clipped out. Photos were cut straight through the line of symmetry and each group were allowed one. I explained that they needed to coach each other through this complex task and it wasn't going to be easy.
