Drug Slang Dictionary - Words Starting With A

This is a list of roots, suffixes, and prefixes used in medical terminology, their meanings, and their etymologies. Most of them are combining forms in New Latin and hence international scientific vocabulary. There are a few general rules about how they combine. First, prefixes and suffixes, most of which are derived from ancient Greek or classical Latin, have a droppable -o-.

"The Language of Sadosomochism" contains vocabulary and defines activities that many will find offensive. It has been published to aid linguists, folklorists, sociologists, psychologists, and other adult researchers develop a better understanding of this subculture. "The Language of Sadosomochism" represents the first systematic, comprehensive account ever attempted of the specialized terminology used by sadosomochists. The work is divided into three distinct sections. Part one provides a thorough introduction to the subculture of sadosomochism, its history in the Western world, and its place in American culture, in literature, and in the work of non-linguist social scientists. Part two is a comprehensive glossary of more than 800 terms currently in use among sadosomochists. For each term the authors provide part-of-speech labels, etymologies, definitions, citations illustrating actual usage, related forms of the word, cross references to semantically and conceptually related terms, and special notes on usage. Part three contains a linguistic analysis of the terminology and illustrates how the language of sadosomochism is related both to the English language as a whole and to the sadosomochists who use the specialized language. The book concludes with a complete bibliography of all references cited, a list of difficult-to-find sadosomochism-related periodicals, and an index providing easy access to groups of semantically and conceptually related terms.

This report presents the recommendations of the WHO Expert Committee responsible for updating the WHO Model List of Essential Medicines. The first part contains a progress report on the new procedures for updating the Model List and the development of the WHO Essential Medicines Library. It continues with a section on changes made in revising the Model List followed by a review of some sections such as hypertensive medicines and fast track procedures for deleting items. Annexes include the 13th version of the Model List and items on the list sorted according to their 5-level Anatomical Therapeutic Chemical classification codes.
