Inside, you'll learn the different types of risk, how and where they appear in different types of institutions, and how the regulatory structure of each institution affects risk management practices.

Amazon.com: Risk Management and Financial Institutions
Some institutions manage risks, while others contract to avoid them. We contrast these two methods in two different institutions - a passive institution, namely, a real estate mortgage investment conduit (REMIC), and one of the most actively managed financial firms, a commercial bank. Risk Management and Financial Institutions, Edition No. 5

Financial institutions can manage the risk exposures arising from lending and deposit-taking activities using nancial derivatives; indeed, nancial institutions are the largest users of derivatives, measured in terms of gross notional exposures.

Risk Management in Financial Institutions

According to this theory, financial institutions should completely hedge the tradable risks they face. Moreover, since risk management should not be a concern for unconstrained institutions, they conclude that more financially constrained institutions should hedge more or, in other words, that hedging should be decreasing with measures of net worth.
