Blood alcohol levels in road traffic accidents: Factors ...  
The relationship between number of beers consumed (x) and blood alcohol content (y) was studied in 16 male college students by using least squares regression. The following regression equation was obtained from this study: y-hat = -0.0127 + 0.0180x The above equation implies that: each beer consumed increases blood alcohol by .0127 on average it takes 1.8 beers to increase blood alcohol content by .01 After consuming 1 beer, blood alcohol equals .0180, each beer consumed increases blood ...

Answered: The relationship between number of... | bartleby  
While the relationship between alcohol and high blood pressure can be a positive one when drinking is light to moderate, what about heavy drinking? If you drink too much, it can have quite the opposite effect and raise your blood pressure. If you're a heavy drinker and you gradually cut back on alcohol, you can lower your blood pressure significantly in many cases. If you're a long-term heavy drinker and you stop suddenly, it can cause a spike in blood pressure.

Alcohol & High Blood Pressure | The Recovery Village  
The relationship between serious injury and blood alcohol concentration (BAC) in fatal motor vehicle accidents: BAC = 0.01% is associated with significantly more dangerous accidents than BAC = 0.00% - Phillips - 2011 - Addiction - Wiley Online Library
