From the early 1790s until after the turn of the century, a very productive but also controversial exchange took place between Reinhold and Fichte. Though many key aspects of post-Kantian philosophy were discussed, the philosophical confrontation between Reinhold and Fichte is most instructive for the understanding of post-Kantian philosophy. The exchange started when Fichte published his verdict on Reinhold's *Elementarphilosophie* and disapproved of its fundamental principle. In 1794 Fichte challenged Reinhold by presenting his *Wissenschaftslehre*. Reinhold was not convinced of Fichte's foundation of philosophy at first, but announced that he accepted the *Wissenschaftslehre* in 1797. While Reinhold and Fichte officially collaborated in the following three years, tensions concerning fundamental questions were still present. When Reinhold adopted Rational Realism, his relation to Fichte deteriorated and the exchange between the two finally ended. The contributions in the present collection focus on the central systematic issues at the different stages of the confrontation between Fichte and Reinhold, thereby illuminating questions that are essential to the understanding of the evolution of post-Kantian German philosophy.

How do the weak win wars? The likelihood of victory and defeat in asymmetric conflicts depends on the interaction of the strategies weak and strong actors use. Using statistical and in-depth historical analyses of conflicts spanning two hundred years, in this 2005 book Ivan Arreguín-Toft shows that, independent of regime type and weapons technology, the interaction of similar strategic approaches favors strong actors, while opposite strategic approaches favors the weak. This approach to understanding asymmetric conflicts allows us to make sense of how the United States was able to win its war in Afghanistan (2002) in a few months, while the Soviet Union lost after a decade of brutal war (1979-89). Arreguín-Toft's strategic interaction theory has implications not only for international relations theory, but for policy makers grappling with interstate and civil wars, as well as terrorism.
