A renowned Soviet director discusses his theory of film as an artistic medium which must appeal to all senses and applies it to an analysis of sequences from his major movies

March of the Falsettos" is the title song of this act of the show. William Finn planned on calling the show "The Pettiness of Misogyny", but then he decided to go with a less direct and more subtle title, calling it "March of the Falsettos". But what does the title mean? The central theme of the show is the characters lack of maturity (as they also state themselves in this song) and their journey of growing out of their childish behavior. Something that for instance Marvin needs to do to be the father Jason needs. Jason, whose voice hasn't yet changed, sings an octave higher than the other three men throughout the show. This is the only song, that all four men sing in the same register, since Marvin, Medel and Whizzer sing in the falsetto, losing the symbol of manhood - their changed voices. None of these men have grown up yet. All of them are still very self-centered, self-involved and insist on getting whatever they want. The "March of the Falsettos" is their journey from childhood to becoming adults.

Reveals the tactics used by businesses to create consumer needs and desires for products that waste resources and finances in addition to undermining human values and independence.

Hailed by national leaders as politically diverse as former Vice President Al Gore and former House Speaker Newt Gingrich, Generations has been heralded by reviewers as a brilliant, if somewhat unsettling, reassessment of where America is heading. William Strauss and Neil Howe posit the history of America as a succession of generational biographies, beginning in 1584 and encompassing every-one through the children of today. Their bold theory is that each generation belongs to one of four types, and that these types repeat sequentially in a fixed pattern. The vision of Generations allows us to plot a recurring cycle in American history -- a cycle of spiritual awakenings and secular crises -- from the founding colonists through the present day and well into this millenium. Generations is at once a refreshing historical narrative and a thrilling intuitive leap that reorders not only our history books but also our expectations for the twenty-first century.

Winner of the Pulitzer Prize "The book is a form of meditation, written with headlong urgency, about seeing. . . . There is an ambition about her book that I like. . . . It is the ambition to feel." — Eudora Welty, New York Times Book Review Pilgrim at Tinker Creek is the story of a dramatic year in Virginia's Roanoke Valley, where Annie Dillard set out to chronicle incidents of "beauty tangled in a rapture with violence." Dillard's personal narrative highlights one year's exploration on foot in the Virginia region through which Tinker Creek runs. In the summer, she stalks muskrats in the creek and contemplates wave mechanics; in the fall, she watches a monarch butterfly migration and dreams of Arctic caribou. She tries to con a coot, she collects pond water and examines it under a microscope. She unties a snake skin, witnesses a flood, and plays King of the Meadow with a field of grasshoppers. The result is an exhilarating tale of nature and its seasons.
